

# Grades, Speeds & Feeds

## Grades

RS20	RS21	RS23	RS27
An uncoated K20/K30 extra-fine grain carbide giving outstanding performance in thread milling applications	A TiAlN coated extra-fine grain carbide grade giving a hardness of 3,300 HV and a maximum working temperature of 900°C	A TiCN coated extra-fine grain carbide grade giving a hardness of 3,000 HV and a maximum working temperature of 400°C	A TiN coated extra-fine grain carbide grade giving a hardness of 2,300 HV and a maximum working temperature of 600°C

## Cutting Speeds & Feeds

Material Designation		Hardness (HB)	Tensile Strength Rm (N/mm <sup>2</sup> )	Cutting speed Vc (m/min)			Feed rate fz (mm/tooth)								
				RS20	RS21 RS23	RS27	Nominal shank diameter								
Steels	Free-cutting steels	<200	<700	110	150	0.01	0.018	0.023	0.025	0.03	0.04	0.04	0.045	0.05

The above data is intended as a guide only. Cutting speeds are recommended starting points, and can be adjusted by ±10%. Values will need to be adjusted to take into account machine condition, clamping, tool extension, coolant, etc. Sample programmes can be supplied to suit your individual requirements.
